

Database-enable any online form instantly! No technical skills required.

Capture submissions from any form in a fast and secure online database without any database or web programming knowledge. Caspio ExpressDB's patent-pending technology automatically creates a database for you.

Easy Two-Step Process

If you can "copy and paste", you can use Caspio ExpressDB! Just give your database a name, then enter your "thank you" page URL and notification email address.

Next, copy the provided activation code and paste it into your form's source code. Your form is now activated and the database will be generated automatically as soon as the first submission arrives.

Save huge development costs and bring your surveys, registrations and any other form online instantly. Caspio ExpressDB is a trusted low-cost solution designed for immediate and flexible deployment.

"ExpressDB is fantastically useful. I launched several questionnaires for different audiences – all within a few minutes. Another happy customer!"

- David Woolf, Businessence.com

Unlimited Forms and Databases

One Caspio ExpressDB account is all you need to database-enable any number of forms, each with its own auto-generated database.

Automatic Email Alerts

Don't stay in the dark! With automatic email alerts, you are notified whenever new submissions arrive in your account.

Total Design Freedom

Maintain 100% control over the look and feel of your forms. Caspio ExpressDB automatically works with any form!

Universal Compatibility

Forms powered with Caspio ExpressDB can be uploaded to any web site running on any platform.

Free Forms Library

Save even more time by using one of our professionally designed forms.

Unlimited Account Storage and Data Downloads

Keep your data in your account for as long as you need since you're not limited on storage. Download your data as often as you want.

Mission-Critical Service Reliability

Since 2001, Caspio's world-class services have included state-of-the-art security, infrastructure redundancy, 24/7 monitoring and free support.

About Caspio: Caspio's software-as-a-service products empower non-technical users to quickly deploy sophisticated data-driven web applications. Since 2001, organizations have trusted Caspio to provide and maintain high-quality, reliable applications that seamlessly integrate and scale with any web site. Caspio's all-in-one solutions eliminate the need to invest in time-consuming and costly development projects, hire expensive programmers, or purchase additional software and hardware. Headquartered in Mountain View, California, Caspio's clients include Fortune 500 corporations, small-to-medium sized businesses, and government and educational institutions.
